

BASIC AIR OPERATIONS

S-270
16 Hours

COURSE DESCRIPTION

This course covers aircraft types and capabilities, aviation management and safety for flying in and working with agency aircraft, tactical and logistical uses of aircraft, and requirements for helicopter take-off and landing areas.

Note: The regulations, procedures and policies addressed in this course are primarily those governing federal agency and ICS operations. State, county, municipal or other political subdivisions using this course will need to consult their agency having jurisdiction with respect to regulations, procedures and policies.

OBJECTIVES

Define and discuss the ICS criteria for typing aircraft, aircraft safety procedures, aircraft performance, pilot and aircraft certification, flight planning and flight following, aviation specific procedures, reporting mishaps, tactical and logistical uses, water and retardant drop techniques, and construction of helispots.

TARGET GROUP

This course is required training for all personnel desiring to be qualified as a Single Engine Air Tanker Manager (SEMG). This course also supports development of knowledge and skills for: Single Resource Bosses, Helicopter Manager (HMGB), Aircraft Dispatcher (ACDP), and other positions that require basic knowledge of aviation operations.
